

Áreas de figuras planas (Cuadrado y rectángulo)

Solución

❖ Calcula el área de las siguientes figuras planas:

5 m

$$A = l \times l$$

$$A = 5 \times 5 = 25$$

$$A = \underline{25 \text{ m}^2}$$

9 Hm

3 Hm

$$A = b \times h$$

$$A = 9 \times 3 = 27$$

$$A = \underline{27 \text{ Hm}^2}$$

9 cm

12 cm

$$A = b \times h$$

$$A = 12 \times 9 = 108$$

$$A = \underline{108 \text{ cm}^2}$$

1,5 dm

$$A = l \times l$$

$$A = 1,5 \times 1,5 = 2,25$$

$$A = \underline{2,25 \text{ dm}^2}$$

13 Km

$$A = l \times l$$

$$A = 13 \times 13 = 169$$

$$A = \underline{169 \text{ Km}^2}$$

17 Dam

9 Dam

$$A = b \times h$$

$$A = 17 \times 9 = 153$$

$$A = \underline{153 \text{ Dam}^2}$$

7.2 cm

14 cm

$$A = b \times h$$

$$A = 7,2 \times 14 = 100,8$$

$$A = \underline{100,8 \text{ cm}^2}$$

38 Hm

$$A = l \times l$$

$$A = 38 \times 38 = 1.444$$

$$A = \underline{1.444 \text{ Hm}^2}$$
