

## Sumas y restas de enteros y fracciones

### Calcula

\* Realiza las siguientes fracciones y simplifica siempre que puedas:

$$4 + \frac{1}{2} =$$

$$22 - \frac{64}{4} =$$

$$5 + \frac{6}{3} =$$

$$\frac{7}{5} + 3 =$$

$$\frac{5}{4} + 2 =$$

$$\frac{210}{5} - 16 =$$

$$9 - \frac{3}{4} =$$

$$\frac{40}{13} - 2 =$$

$$\frac{15}{2} - 2 =$$

$$10 - \frac{5}{3} =$$

$$\frac{20}{3} - 6 =$$

$$\frac{19}{5} - 3 =$$

$$6 - \frac{16}{5} =$$

$$18 - \frac{110}{8} =$$

$$7 + \frac{26}{4} =$$

$$16 - \frac{15}{2} =$$

$$20 + \frac{10}{6} =$$

$$\frac{31}{5} - 6 =$$

$$\frac{70}{9} - 7 =$$

$$\frac{4}{9} + 5 =$$
